## SAKE (NIHON-SHU) | 日本酒

Sake is a traditional Japanese drink that is made from fermented rice. It has been consumed and used for religious ceremonies for over 2000 years now. Japan is a country known for its customs and traditions, and sake, a traditional drink also involves traditions and customs.

For many centuries now sake has been shared by family members and friends and is a drink that is raised to toast the most important bonds in life. It is believed that you should not pour your own cup of sake, but it must be poured by a friend and likewise. Sake is a drink that is to be shared and enjoyed with the people that you love and revere.

Five crucial elements are involved in brewing sake – water, rice, technical skill, yeast and land/weather. More than anything else, sake is a result of a brewing process that uses rice and lots of water. Water comprises as much as 80% of the final product, so fine water and fine rice are natural prerequisites if one hopes to brew great sake. But beyond that, the technical skill needed to pull this all off lies with the Toji (head brewers), the type of yeast they use, and the limitations entailed by local land and weather conditions.

## JUNMAI | 純米

*This can be translated as pure rice sake. Nothing is used in its production except rice, water, and koji, junmai is made with rice that has been polished (milled) so that at least 30% of the outer portion of each rice grain has been ground away. The taste of Junmai is usually a bit heavier and fuller than other types, and the acidity is often a touch higher as well.*

## HONJOZO | 本釀造

*Honjozo is sake to which a very small amount of distilled alcohol (called brewers alcohol) has been added to the fermenting sake at the final stages of production. Honjozo is made with rice that has been milled so that at least 30% of the outer portion of each rice grain has been ground away. This process makes the sake lighter, sometimes a bit drier, and in the opinion of many, easier to drink. It also makes the fragrance of the sake more prominent.*

## JUNMAI GINJO | 純米吟釀

*Junmai Ginjo is made with no added alcohol. It is more delicate and light and complex than the above two Junmai and Honjozo. On top of that, special yeast, lower fermentation temperatures, and labor-intensive techniques make for fragrant, intricate brews.*

## GINJO | 吟釀

*Ginjo is made with rice that has been milled away 40%. It is made in a very labor intensive way, fermented at colder temperatures for a longer period of time. The flavor is more complex and delicate, and both the flavor and the fragrance are often fruity and flowery.*

## JUNMAI DAIGINJO | 純米大吟釀

*Junmai Daiginjo is made with no added alcohol. The rice has been milled so that no more than 50% of the original size of the grains remains, and even more care has been taken to create sake representative of the pinnacle of the craft.*

## DAIGINJO | 大吟釀

*Daiginjo is made with rice polished even more, so that no more than 50% of the original size of the grain remains.*

## HOT SAKE BY THE BOTTLE

### 熱燗 - 四合瓶

Sake has been enjoyed warm since long ago, and many producers keep that tradition alive. The taste of sake changes with temperature. We chose the temperature which best matches the food or the season. The ideal temperature for sake also depends on the type of sake. We warm it in a small decanter, in a pool of hot water.

## SHOCHU - BY THE BOTTLE

燒酎 ボトル

*Shochu is a popular Japanese spirit that can be made from barley, sweet potatoes, rice, buckwheat, and brown sugar. It originated in southern Japan, but has been enjoyed all over the country, and the world, for more than 400 years. Shochu, like other spirits, can be enjoyed in numerous ways, the most traditional of which mixes Shochu with hot or cold water. It can also be enjoyed straight or on the rocks.*

## JAPANESE WHISKY | 日本のウィスキー

*Two of the most influential figures in the history of Japanese whisky are Shinjiro Torii & Masataka Taketsuru. Torii was a pharmaceutical wholesaler and the founder of Kotobukiya (later to become Suntory). He started importing western liquor and he later created a brand called 'Akadama Port Wine', based on a Portuguese wine which made him a successful merchant however, he was not satisfied with this success and so he embarked on a new venture which was to become his life's work: Making Japanese whisky for Japanese people. Despite the strong opposition from the company's executives, Torii decided to build the first Japanese whisky distillery in Yamazaki, a suburb of Kyoto, an area famous for its excellent water.*

*Torii hired Masataka Taketsuru as a distillery executive. Taketsuru had studied the art of distilling in Scotland, and brought this knowledge back to Japan in the early 1920s. Whilst working for Kotobukiya, he played a key part in helping Torii establish the Yamazaki distillery. In 1934 he left Kotobukiya to form his own company, 'Dainipponkaju', which would later change its name to Nikka. in this new venture he established the Yoichi distillery in Hokkaido.*

**KAIYŌ****KAIYO MIZUNARA OAK "THE PEATED" MADEIRA CASK | SINGLE MALT** 36

PLUM, CARAMEL, GREEN APPLE

*The Peated is matured initially for two years in ex-Madeira wine barrels to impart a sweetness and softening balance to its level of peat. It is then transferred to Japanese Mizunara Oak, where it continues to mature for the rest of its days until Kaiyo's Master Blender deems it ready for bottling and enjoyment.
